

# LIVESTOCK AND POULTRY

## LIVESTOCK VALUE DECLINED

The January 1, 1975 inventory value of cattle and sheep totaled 534.4 million dollars. The December 1, 1974 inventory of hogs, chickens and turkey breeder hens was valued at 311.7 million dollars making the combined end-of-year livestock and poultry value 846.2 million dollars. This is 43% less than the previous year-end inventory value for the five species. The value of the poultry inventory was slightly above the previous year but other species were down sharply. The value of all cattle, which accounted for 62% of the combined value, was down 49% from a year earlier. Cattle numbers decreased slightly but the per head value was down nearly one-half. Hogs accounted for 35% of the total inventory value and were down 32% from a year earlier. The sheep inventory value was down 11% but the chicken and turkey breeder hen values were up 1% and 3% respectively.

## CATTLE INVENTORY DOWN 2 PERCENT

The number of cattle and calves on Illinois farms on January 1, 1975 was 3,200,000, down 50,000 from a year earlier and 40,000 below two years earlier. During 1974 there was a small build-up in the numbers of beef cows and heifers over 500 pounds being kept for beef herd replacements. But these increases were more than offset by declines in milk cows and the kinds of cattle usually on feed for slaughter markets--steers and other heifers over 500 pounds. Changes in other classes of cattle were small. Beef cows increased 23,000 to 868,000 or 27.1% of the total January 1, 1975 inventory. Beef replacement heifers increased 14,000 to 144,000. Milk cows declined 8,000 to 257,000. Heifers over 500 pounds other than those being kept for milk or beef herd replacements dropped 56,000 to 294,000 while steers over 500 pounds dropped 34,000 to 640,000. With prices much lower at the end of the year than at the beginning of the year the inventory value fell sharply. At \$165 per head the average value of all cattle and calves on January 1, 1975 was just over half of the year-earlier average value and combined with the 2% reduction in the number of head resulted in a decline in total inventory value to 528 million dollars from slightly over a billion dollar inventory value a year earlier.

## MILK PRODUCTION CONTINUES DECLINE

Total milk production in Illinois in 1974 is estimated at 2,596 million pounds, down 4% from the 2,717 million pounds produced in 1973. The annual average number of milk cows on farms in 1974 was 262,000 head, down 4% from the previous year. Milk production per cow declined from 9,989 pounds in 1973 to 9,908 pounds in 1974.

## CALF CROP UNCHANGED

Calves born on Illinois farms during 1974 are estimated at 1,030,000 head, the same as the number born during 1973. About 1 out of 50 calves born in the U. S. is born on an Illinois farm.

## HOGS AND PIGS INVENTORY DOWN 12 PERCENT

All hogs and pigs on Illinois farms totaled 6,500,000 head on December 1, 1974, down 12% from a year earlier. Hogs and pigs kept for breeding were down 19%. Market hogs and pigs were down 10%. Numbers of market hogs and pigs under 60 pounds decreased 20%, 60-119 pounds decreased 4%, 120-179 pounds decreased 6%, 180-219 pounds decreased 2%, and 220 pounds and over decreased 10%. The average value per head was \$46.00 on December 1, 1974, compared with \$59.50 a year earlier, and \$43.00 on December 1, 1972.

## 1974 PIG CROP DOWN 10 PERCENT

Illinois swine producers accounted for approximately 12% of the United States pig crop in 1974. The Illinois pig crop for 1974 totaled 10,145,000, down 10% from the 1973 crop. Nearly 24% of the 1974 pig crop was produced in the 12 counties of the Northwest District. Slightly under 19% was produced in the 13 counties of the West South-west District, and the 9 counties of the West District produced slightly under 17% of the Illinois total. The number of sows farrowing from December 1, 1973 to November 30, 1974 totaled 1,495,000 compared with 1,624,000 the previous year. The average litter rate of 6.8 in 1974 was slightly lower than the 6.9 obtained in 1973.

## SHEEP NUMBERS CONTINUE TO DECLINE

All sheep and lambs on Illinois farms on January 1, 1975 totaled 229,000, down 9% or 23,000 from the 252,000 head on farms a year earlier. Sheep and lambs on feed in Illinois January 1, 1975 numbered 34,000 compared with 42,000 a year earlier. Stock sheep and lambs totaled 195,000, 7% below the 210,000 head the previous year. The average value of all sheep, including feeders, on farms January 1, 1975 was \$28.00 compared with \$28.50 a year earlier. Total value declined from 7.2 million dollars to 6.4 million dollars.

The 1974 lamb crop is estimated at 176,000, 8% below the previous year's 191,000. The number of lambs saved per 100 ewes in Illinois was 110 compared with 95 nationally.

## CHICKEN FLOCK DECLINES

Chickens (excluding broilers) on Illinois farms on December 1, 1974 were estimated at 8,550,000 birds--down 2% from a year earlier. The December 1 numbers included 2,565,000 hens and 4,185,000 pullets of laying age for a laying flock of 6,750,000--down 5% from the previous year. Pullets over 3 months old but not of laying age totaled 1,030,000 and pullets under 3 months totaled 685,000. The average value per bird was \$1.45 on December 1, 1974, compared with \$1.40 a year earlier.

Egg production in 1974 was 1,543 million eggs, 8% below 1973.

## TURKEY BREEDER HEN INVENTORY CONTINUES TO INCREASE

Turkey breeder hens on hand in Illinois December 1, 1974, numbered 38,000 compared with 35,000 in 1973. The average value of breeders at \$9.00 this December 1 was down from \$9.50 per bird December 1, 1973. The number of turkeys raised in 1974 totaled 520,000 compared with 593,000 in 1973, a decline of 12%.
